SUBJECT: PROSPECTIVE PHD INQUIRY IN QUANTUM COMPUTING RESEARCH

Dear Ms. Morissette,

I hope you are doing well.

My name is Elisha Kidenge, and I am an international applicant with a background in Physics and Computer Science. I was referred to you by the graduate recruitment team at Université de Sherbrooke regarding my interest in pursuing PhD studies in quantum computing.

I am particularly interested in research areas related to quantum computing architectures, circuit QED systems, and superconducting qubits, as explored within the Institut Quantique. My academic training includes a Bachelor's degree in Physics and ongoing Master's studies in Computer Science (Artificial Intelligence), with a strong focus on mathematical modeling, algorithm design, and computational methods.

I am especially motivated by the intersection of physics and advanced computational techniques, including optimization and machine learning approaches applied to quantum systems.

I would greatly appreciate any information regarding potential PhD opportunities, available supervisors, or the appropriate steps to formally apply within this research area.

Thank you very much for your time and consideration. I look forward to your guidance.

Kind regards,
Elisha Kidenge
